1. SAP on Cloud Platform

Exercise 1.1

Identify the terminologies being described by each sentence.

1. This is a business management software that allows an organization to use a system of integrated applications to manage the business. It aims to serve as a backbone for your whole business. Enterprise resource planning (ERP)

2. This is also known as Internal Cloud, is a cloud-based infrastructure operated exclusively for a single organization with all data protected behind an internal firewall. Private Cloud

3. This is also known as External Cloud, is available to the public where data are created and stored on third-party servers. Public Cloud

4. This is a key feature of cloud computing where resources can be accessed anywhere (except on limitations set by company's internal control). Location Independence

5. This the place where SAP, a European multinational software corporation, was founded in 1972. Weinheim, Germany

2. Partner Implementation and AIP

Exercise 2.1

1. True or False? The End Customer can directly communicate with SAP for the purposes of project implementation. True

2. What are the duties and responsibilities of the Consultants (or partner organization) when it comes to the implementation of a project?

Consultants should always be communicate to the partners so that the project can move forward and also discuss the project itself.

3. First Phase is the phase of the AIP where the Partner Organization has sit-down workshops with the End Customer in order to create supporting documents detailing the exact business requirements.

4. Each phase of the AIP consists of several tasks with accompanying milestones associated to the completion of said tasks. These serve as “markers” that can be used as proof of work and services rendered, which can be used for billing the End Customer.

5. At the end of each phase, a control mechanism is required so that the phase can be closed, and the next phase can begin.

3. Basic Navigation

Exercise 3.1

Fill each blank with the appropriate words or terminologies that will make the statements correct.

1. The Menu Bar displays at the top of the screen. It contains the Windows standard menu (File, Edit, Wwindow, Help) as well as generic SAP Business One functions.

2. The toolbar is a collection of icon buttons that grant you easy access to commonly used functions.

3. Navigation in SAP Business One is done using the Modules Menu. It arranges the functions of the individual applications in a tree structure.

4. The users of SAP Business One are defined in the User-Setup window.

5. Accessing SAP Business One on Cloud is done using Web Browsers like Google Chrome, Mozilla Firefox or Safari.

4. Advance Exercises

Exercise 4.1 – Branch Name Setting

Input a screenshot of the output where required.

1. Go to Administration > Setup > Financials > Branches
2. Branches Setup window will open. Look for the branch assigned to you then change the Branch Name and Branch Name (Foreign) with your own name.
3. Click Update.

Exercise 4.2 – Payment Terms

Depending on your count (1, 2, or 3) create the appropriate Payment Terms. Add a screenshot of the final output in the box.

1. Each student with the count of 1 will need to create his/her own 2P10Net30.
2. Each student with the count of 2 will need to create his/her own Net30.

3. Each student with the count of 3 will need to create his/her own 3Installments.
4. Each student will add a suffix to their Payment Terms Code with their initials. E.G. A student named John F. Santiago has a count of 2. He will need to create a Net30 pricelist. His Final Price List Code will be **Net30_JFS**.

Exercise 4.3 – Business Partner Master Data Migration

Complete the following Exercises and provide screenshots. Use the data assigned to you.

1. Prepare the upload fields.

ACADEMY
FIRST IN TECHNOLOGY

2. Prepare the Upload File. Show a screenshot of the accomplished file.

3. Finalize the importation. Show a screenshot of the confirmation window showing that the upload completed successfully.

4. Show a screenshot of the list of Business Partners showing your assigned Business Partner now being in the list.

Exercise 4.4 – Item Master Data Migration

1. Prepare the upload fields.

2. Prepare the Upload File. Show a screenshot of the accomplished file.

3. Finalize the importation. Show a screenshot of the confirmation window showing that the upload completed successfully.

4. Show a screenshot of the list of Items showing your assigned Item now being in the list.

Exercise 4.5 – Limited User Creation and Authorization

Create a limited user for the Sales Manager.

1. Create the user with the following parameters:

Field Name	Values
User Code	**SLS_<your initials>**
User Name	**<your name>**
	Neither Superuser nor Mobile User is ticked
Department	Purchasing
Password Reset	Deselect the Change Password at Next Logon checkbox.
Password	P@ssw0rd
Branch Assignment	Set-up assigned branch to you.

2. Define the authorizations. Use the parameters listed below and show a screenshot of the Authorizations table in SAP B1. Make sure that the User Name is shown in the screenshot as well.

Subject	Authorization
General	Full Authorization
Administration	Full Authorization
Opportunities	Full Authorization
Sales A/R	Full Authorization
Business Partners	Full Authorization
Banking	Full Authorization
Inventory	Read Only
Reports	Full Authorization

3. Log in as your created user. Show a screenshot of the list of modules. Include in the screenshot the window showing who the currently logged in user is.

4. Restore the Purchase Order form in the list of modules. **The screenshot should show the list of forms under Purchasing – A/P, and it should show the Purchase Order Form.** Include in the screenshot the window showing who the currently logged in user is. It should show the name of the user you created.

5. Try accessing the Purchase Order Form. Show a screenshot of the error message. Include in the screenshot the window showing who the currently logged in user is. It should show the name of the user you created.

Exercise 4.6 – Alerts Management

1. Create an alert monitoring the Sales Orders created by your user in Exercise 4.5. Your user (**Student <number>**) should be notified if the sales Gross Profit Level falls below 30%. Show a screenshot of the final alert configuration. **The name of the alert should have your initials.**

2. In another window, log in as the user you created in Exercise 4.5. Create a Sales Order that will have the gross profit fall below 30%. Use the parameters below. Show a screenshot of the final Sales Order Form.

Field	**Value**
Customer	C1000
Posting Date	<Date Today> (Use the built-in calendar)
Branch	*Whatever branch you are assigned to*
Item No.	G1000
Quantity	50

ACADEMY
FIRST IN TECHNOLOGY

3. Show a screenshot of your superuser account (**Student <number>**). Show the Message/Alert Overview Window showing that a Sales Order that fell below 30% Gross Profit passed through the system. Include in the screenshot the window showing who the currently logged in user is. It should show the name of the user you created.

4. Deactivate the alert you created.

Exercise 4.7 – Approval Procedures

Create an Approval Procedure where the “manager” could block the creation of a sales order with discounts greater than 15%.

1. Make sure that the Approval Processes are Enabled.

2. Create an Approval Process Stage. Use the following parameters:

Field Name or Data Type	Values
Stage Name	<Your Name>
Stage Description	<Your Name>
No. of Approvals and Rejections Required	1
Authorizer	<Your User Code>
Department	General

3. Create an approval template. **Show a screenshot of each tab.** Use the following parameters:

Field Name or Data Type	**Values**
Name	Discount 15 percent
Description	Discount over 15%
Originator tab: User	<The user you created in Exercise 4.5>
Originator tab: Department	Select Sales (will automatically populate when the user is Selected)
Documents tab	Select the Sales Order checkbox
Stages tab: Stage Name	<Your Name>
Terms tab: Launch Approval Process	select **When the Following Applies**
Terms tab: **Discount%** Checkbox	Tick **Discount%** Checkbox
Terms tab: Discount% Ratio	Greater Than
Terms tab: Discount% Value	15

ACADEMY
BEST IN TECHNOLOGY

4. Set a 20% discount limit for the user you created in Exercise 4.5.

Exercise 4.8 – Test the Approval Procedure

1. Log in as the user you created in Exercise 4.5. Create a Sales Order with discounts exceeding 15%. Show a screenshot of the final Sales Order form with the Currently Logged in user window also shown. Use the following parameters:

Field	Value
Customer	C1000
Posting Date	<Date Today> (Use the built-in calendar)
Branch	*Whatever branch you are assigned to*
Item No.	G1000
Quantity	50
Discount	16%

2. After adding the Sales Order, show the **Request for Document Generation** window. Under the Remarks field, input: **"<Your Name> Procedure".**

A C A D E M Y
FIRST IN TECHNOLOGY

3. Go back to your superuser (**Student <number>**) account and show a screenshot of the **Messages/Alerts Overview** window.

4. Still in your superuser account, show the Pending Sales Order.

5. Still as the superuser, approve the Sales Order. Show a screenshot of the final **Request for Generation Approval** window, before clicking on “Update”.

6. Finally, log in again as the user you created in Exercise 4.5. Show the approved Sales Order Document and add it.

Exercise 4.9 – Query Generation

The following exercises should be done using an OEC (SBODemoGB) Database.

1. Create a query showing the Balances of all Customers. Show only Customers that have non-zero balance. Use the following Parameters:

Parameter	Values
Table	OCRD
Fields	BP Code
	BP Name
	BP Type
	Account Balance
Filters	Show Customer Business Partners Only
	Account Balance should not be equal to zero
Sorting	Descending Order by Balance
